

ABHILASH SK

abhilash.be2024@gmail.com | +91 6364642410 | Bangalore, India

SUMMARY

AI & Decision Science postgraduate skilled in ML, deep learning, and statistical modeling. Built real-world solutions in healthcare and business using ethical, data-driven approaches. Focused on transforming data into actionable insights.

EDUCATION

M.Tech in Artificial Intelligence & Decision Science

Manipal Institute of Technology, Manipal | Expected: 2026 | CGPA: 7.06

B.E in Computer Science & Engineering

Jain Institute of Technology, Davangere | Graduated: 2024 | CGPA: 7.98

Relevant Coursework: Statistics, Data Mining, Generative AI, Probabilistic Graphical Models, Time Series Analysis, Fairness in Machine Learning.

PROJECTS

Psoriasis Detection using CNNs

Built a deep learning model using VGG16 and ResNet50 to classify skin diseases. Improved performance through image preprocessing and data augmentation.

Tools: Python, TensorFlow, OpenCV, Scikit-learn

Hospital Staff Optimization using AI

Formulated a shift scheduling model to minimize labor costs while ensuring fair allocation. Used CVXPY to optimize staff assignments based on availability, skills, and constraints.

Tools: Python, CVXPY, Scikit-learn, Pandas, Matplotlib

Credit Score Prediction using ML

Developed classification models to predict credit scores with high accuracy and fairness. Employed feature selection and tuning to optimize decision-making.

Tools: Python, Scikit-learn, Pandas, Seaborn, Matplotlib

TECHNICAL SKILLS

Languages: Python, C++, SQL

Machine Learning & AI: Scikit-learn, TensorFlow, OpenCV, Fairlearn, pgmpy

Data Science & Analytics: Data Cleaning, EDA, Feature Engineering, Visualization (Matplotlib, Seaborn)

Tools: Git, GitHub, Jupyter, VS Code

Web Technologies: Flask, HTML, CSS, JavaScript

CERTIFICATIONS

Data Science Methodology – Coursera

Machine Learning with Python – Coursera
